

## Variable Panopto Playback Speed

### Step 1

Variable playback requires Silverlight 5 (Firefox or Internet Explorer only). If you don't have Silverlight 5, Panopto will prompt you about it during playback. Click Install Silverlight 5 to go to the download page.

### Step 2

Click Download Now on the Microsoft Silverlight page.

### Step 3

Allow the installer to run if prompted, and then click Install Now.

### Step 4

Once Silverlight is installed, you should see a Playback Rate option below the player controls.

### Step 5

By clicking on the drop-down box, you can select a different playback speed (e.g. 1.50x, 2.00x, etc.).

### More Information

For access to additional information, tutorials and workshops, please visit the Center for Academic Technology website, <http://www.butler.edu/it/cat>, contact any Center for Academic Technology staff member at [training@butler.edu](mailto:training@butler.edu), or contact the Information Commons desk in Irwin Library at [infocommons@butler.edu](mailto:infocommons@butler.edu) or 940-9235.
